

WE pay for our phone service and should have the right to keep these kinds of survey calls and advertising away if we like. If this lawsuit goes through and i receive more unsolicited calls from anyone, ill be getting rid of my existing wired phone line and go to a cell phone. From which i'll then keep changing my phone number if i receive unsolicited calls. If that doesnt work i'll go without a phone. This kind of harrassment must end. Anyone who owned a phone before the no-call list came into effect knows what im talking about in the way of phone solicitation problems. Affiliation could mean ALOT more then they are talking about as well. Please put a STOP to this insanity!
